The application has been amended as requested in the communication filed March 14, 2005 and April 27, 2005. Accordingly, claims 1-35, 38, and 39 have been canceled, claims 36 and 37 have been amended, and new claims 40-48 have been entered.

Claims 36, 37, and 40-48 are pending and under consideration.

Claims 36, 37, and 40-48 are allowed.

The following is an examiner's statement of reasons for allowance: Applicants teach the chemical modification of lipolytic enzyme using hydrophobic acyl groups, and their use in detergent composition, dough, and baked products among others. While chemically modified lipases are known in the prior art, see Basri *et al.* Inada, and Takahashi *et al.*, the prior art teaches a way from using the chemically modified lipolytic enzyme in a hydrolytic reactions in aqueous solution. Both Basri *et al.* and Takahashi *et al.* teach lower hydrolytic activity, substrate selectivity and stability of the modified enzyme in aqueous solution as compared to the unmodified enzyme, see Table II, Figure 1, and the paragraph bridging pages 810-811 of Takahashi *et al.* and Table 2 at page 580 of Basri *et al.* The hydrolytic activity of the chemically modified lipolitic is the desired activity in a detergent composition. Deleting the claims to the chemically modified lipolytic enzymes and amending the claims to a detergent composition comprising the chemically modified lipolytic enzyme and surfactant renders the claims allowable because the prior art does not suggest or teach the use of chemically modified lipolytic enzymes in a detergent composition with surfactant.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
